STEPHANIE C. KOPELOUSOS
SECRETARY

May 11, 2007

Mr. Butch Eley, CEO
Infrastructure Corporation of America
10626 E. U.S. 92
Tampa, Florida 33610

Dear Mr. Eley:

On behalf of the Florida Department of Transportation, I am expressing thanks for the extraordinary efforts your company performed in replacing the I-375 and Licata bridges that were damaged as a result of accidents recently. Your leadership and around the clock dedication resulted in the I-375 bridge being reopened 25 days after the incident and nine days earlier than projected. This service to the public cannot be recognized enough, as expressed in the attached letter from Mayor Rick Baker of St. Petersburg. While there are many people to thank, I specifically want to mention David Novakoski and Ernie Molina for their roles.

Thank you again for your team and the great accomplishment.

Sincerely,

Donald J. Skelton, P.E.

RE: Repairs to I-375

Dear Don,

I would like to personally and on behalf of the citizens of St. Petersburg thank you for the outstanding job the Florida Department of Transportation and its contractor have done in the completion of the repairs to I-375.

On the night of March 28, 2007 when the accident occurred, we observed the fire and damage to the I-375 ramp and surrounding area, and felt certain that we would be without the benefit of this artery into our downtown area for sometime in the future. We strongly supported your activities to complete the improvements as quickly as possible. We are amazed at the quick handling that has occurred on these repairs and commend the fine job the Florida Department of Transportation has done in executing the required improvements. Again, thanks to you and your staff for the outstanding job they have done in bringing this project to completion ahead of schedule and reopening the interstate connection into our downtown area.

Sincerely,

Rick Baker
Mayor
